Professional Summary

Senior Flutter Engineer with 5+ years of experience building production-grade cross-platform applications, including embedded-integrated user interfaces and device-connected features. Strong expertise in Flutter/Dart, custom widgets, animations, state management (Riverpod/BLoC), and high-performance UI architecture. Experienced working with embedded teams, optimizing resource usage, and ensuring reliable UI-hardware communication in constrained environments.

Core Skills

Flutter & Dart	5+ years, custom widgets, animations, responsive UI, Flutter DevTools
Embedded UI Integration	Linux environments, microservices, hardware APIs, platform channels
Protocols	REST, WebSockets, MQTT, gRPC (working knowledge)
State Management	BLoC, Riverpod, Provider
Tools	Git, GitHub, JIRA, CI/CD pipelines
Other	Performance profiling, memory management, debugging, UX/UI collaboration

Professional Experience

Cognizant — Senior Flutter Engineer & UI/Embedded Integration — 2024–2025 • Developed advanced Flutter UI components interacting with backend AI & microservices. • Collaborated with embedded and systems engineers to ensure seamless UI integration with lower-level services. • Applied performance optimization strategies for constrained environments and hardware-limited devices. • Participated in architecture design decisions, code reviews, and component reusability.

Microsoft / LTI Mindtree — Azure App Services Engineer — 2023–2024 • Worked within Linux-based cloud environments and service communication layers. • Troubleshoot complex systems, network communication endpoints, and certificate-based service authentication. • Collaborated across teams to maintain high reliability and operational performance of deployed applications.

La Plata — Flutter Developer — 2020–2023 • Built and deployed multiple production Flutter apps. • Designed reusable UI components, implemented state management and responsive layouts for different device sizes. • Integrated Flutter with native OS services and external APIs.

Education

UNED — Computer Engineering

Asunción Polytechnic University — Professional Flutter & Multi-Platform Development • Focus on UI development, mobile software architecture, and cross-platform design patterns.
